## DARTMOUTH FRESHMEN TO ACE P. A. SWIMMERS

Conch Dake Believes Victory Over Strong Greek Team Probable

The Andover swimming team will meet a strong Dartmouth Freshman squad this afternoon in the second encounter of its cam-

After administering the crushing 57 to defeat to the Brown Freshmen last Saturday, Coach Dake is confident of a victory over Dartmouth. However, the Greens do have powerful bunch of swim-mers to showed up well in their meet, taking High School 45 to 26.

Andover's backstrokers, breaststrokers and divers are coming into fine shape, and two freestyle records have already been broken inspectice. The first of these new records was 2 min. 10 sec. for the 200 yard set at the beginning of the term by Cushman. The other records was made Wednesday of this week by Captain Wingate who did the 100-yard in 55 3-5 sec. The Blue line-up for today, (Continued on Page 6)

### CC CH CLUB PLANS HAVE MODELS POSE

ovides Means For Members To Develop Talent In Drawing, Rainting, Or Sculpture

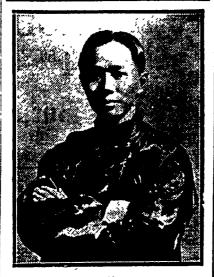

The Sketch Club decided Wednesday to hire a model to pose for the members on Saturday afternoon rom two to three. The Sketch Clib arges all members and would-be members to come as this is only trial and will be continued only ithe demand warrants it. Inas-nucleas this work closely parallels that carried on by the students in the Opper Middle art courses, it that it will appeal to the rtistically inclined members of the er classes and to Seniors

> Sketch Club this year is ly in the charge of its under William B. Miller. and Harold Cross, secasurer. It provides a fine

to continue their work

## HOCKEY TEAM DEFEATED IN OVERTIME PERIOD

Andover's Steady Upclimb Proves Of No Avail In Close Contest

#### DAVIS AND GARDNER STAR IN ICE BATTLE

The Andover hockey team suffered a heart-breaking defeat against Noble and Greenough in its opening game of the season. Trailing 2-0 midway through the last period, the Blue team rallied gamely and finally tied the score on a pair of goals by Captain Davis only to lose in overtime on a goal scored with but five seconds of play remaining. Davis and Gardner were Andover's standout players.

In the first period Noble and Greenough thoroughly outplayed its rivals, and it was only the splendid goal tending of Holt that prevented them from scoring. Andover seemed to be very disorganized and could not get its passing plays working. In the second period Andover wasted many excellent scoring chances, while Noble and Greenough capitalized on two chances and scored goals on both of them.

Though the Blue team showed as gained them anything. At this place since the Haverhill defeat. time Davis scored on a long shot. This redoubled the Blue's efforts. and they threatened several times before tying the score on the prettiest play of the game. Curtis skated over the Blue line with the buck, drew the defence to one side then passed to Davis, who lifted the puck into the cage with a perfect shot. Then came the overtime and Andover's unfortunate defeat.

Generally, the failure of Andover's forwards to make their (Continued on Page 5)

### BIRD CLUB MEMBERS **BANQUET IN BOSTON**

Higgins And Boyle Accompany Group To New England Association's **Annual Meeting** 

Monday evening Mr. Higgins and Mr. Boyle took a group of boys to the annual meeting of the New England Bird Banding Association at the University Club in Boston. The boys were D. Wil liams, Dempsey, Scully, and Berry,

After a buffet supper the Association heard speeches by men nationally prominent in the conservation of wild life. The first lecture was on the beaver sanctuary in Lenox, Massachusetts, Five reels of movies taken in Labrador and the Button Islands by the Bowdoin-Macmillan expedition of 1934 showed the variety and significance of bird life in those regions. This expedition was made up of Captain Macmillan and faculty mem-

## SOCIETY OF INQUIRY TO HEAR DR. T. Z. KOO

Chinese Brilliant Diplomat Guest Of Academy This Week-End

NOTED FOR RELIGIOUS WORK

Dr. Kinsolving And Norman Thomas Listed With Other Speakers In Term's Schedule

The school is very fortunate in having Dr. T. Z. Koo, famous Chinese internationalist and vital religious speaker, Sunday. Dr. Koo has just left his native country, China, and his talks on China and related subjects should be of great interest to everyone.

Dr. Koo's program consists of a sermon at morning chapel, a talk at the vesper service, and a forum discussion with the Society of Inquiry. While the subjects of his talks are not positive, he will probably speak in the morning on the topic, "Avenues to God." at the vesper service on "Living Issues of Modern Life," and before the Society of Inquiry on "The Far Situation and World Peace.'

A graduate of St. John's University at Shanghai, Dr. Koo was for nine years an official in the Administrative Department of the Chinese Railway before joining the staff of the National Committee of the Young Men's Christian Association of China, with special responsibilities toward the Colleges and Universities, to which was added the cultivation of better international relations.

In 1925 he went to Geneva as a member of the Second Opium Conference called by the League of Nations, being one of the three chosen to represent the Chinese

## BLUE TO PLAY M. I. T. IN BASKETBALL TODAY

Quintet Loses To Lowell High By 29-25 Score After Thrilling Rally

Those who saw the basketball game against Lowell High School, distinct improvement in the third which Andover lost 29-25, also saw period, it was not until this session a tremendous improvement in the was half over that their efforts Andover team which has taken

> Viens, who was acting captain, showed a great amount of fight and pep. He ably backed up the team from the guard position and made a fine show in his efforts to stop the fast attack of the opponents. Lyford, who is new to the Andover squad, was also outstanding for his hard playing and his contributions to the final score. Out of five attempts at foul shots he made good on four. His passing and blocking scorer of the afternoon was Cam-Kellogg at center, netted a total of ten points.

Not only was the individual playing noticeable, but Mr. Billhardt the improvement shown over the playing of a month ago. He says, 'The team has a better idea of playing together, and that is essential to good playing. The shots are no longer wild stabs from the center stripe, but consist mainly of short, well-planned shots from correct positions." His attitude toward the remainder of the season is entirely optimistic, and he is expectantly waiting for the day when he can count on Captain Kellogg, captain of the basketball team for the third consecutive year, as be ing permanently in the line-up.

Taken on the whole, last Wednesday's game was neither discouraging nor exhibarating. spots the team played exceptional prep school basketball. For instance, the last rally which was started too late to achieve its

Andover Skiers To Take Snow Train On Sunday

The first "Snow Train" of the winter term which may be taken by Andover students, leaves Lawrence tomorrow morning at 8:45 and will return at 9:40 that evening.

Anybody in school is allowed to take this inexpensive trip providing he is in good scholastic standing. The number of those who go to Crawford Notch, however, will be limited to 15 students. Dr. Fuess has announced that a student may take two of these trains during the winter and that they will not be counted as day excuses. Any who are interested should get in touch with Mr. Sanborn immediately to make arrange-

## **WRESTLING TEAM READY** FOR MATCH TODAY

h Quincy High First On Hard Schedule This Year North

#### NO 175-POUND CLASS IN DIFFICULT MEET

Facing the coming season confidently, the wrestling team is working hard to get in trim. Tryouts have been held in Bulfinch Hall this week in order to ascertain who will compete in the match with North Quincy High today.

The wrestling team this year is facing a schedule considerably harder than last year's. A match has been scheduled for every consecutive week, and on Feb. 23, the Andover team will enter the New England Interscholastics at Harvard. The team, however, is claimed to be better this year and capable of handling its difficult job.

The meet today will give the team a chance to prove its mettle. North Quincy High usually turns out powerful teams, much

## GLACIER PRIEST GIVES LECTURE HERE REPLETE WITH HOMELY HUMOR

"The Valley Of 10,000 Smokes" Subject Of Reverend Bernard Hubbard

MOVIES ACCOMPANY TALK

Pictures Of Immense New Volcano And Volcanic Pup Feature Remarkable Film

The Glacier Priest, Reverend Bernard Hubbard, lectured Friday evening on the subject, "The Valley of Ten Thousand Smokes.' He addressed the audience in a loud, clear voice and a straightforward manner, keeping his listeners in a gay mood for the greater part of his talk by his really humorous remarks.

In the first few minutes he disillusioned them concerning Alaska. It is not full of Esquimaux, living in igloos, and polar bears. The natives use mud huts for shelter and don't know what an igloo is. Mr. Hubbard has vet to see a polar bear outside of a zoo. The Glacier Priest spent nearly an hour telling anecdotes about his many trips into Alaska. The second half of his lecture dealt entirely with his real subject, "The Valley of Ten Thousand Smokes.'

After telling the audience about the natives and polar bears, Father Hubbard went on to say that Alaska

## KEN REEVES TO PLAY AT TEA DANCE JAN. 26

Many Popular Engagements Have Been Held By Orchestra

The Senior Council will hold on January 26 what promises to be the best tea-dance of the season. The dance will be from 4:30 to 7:30 in the Commons. Ken Reeves and his Orchestra will play.

This well-known orchestra has had many past engagements worth noting. They first became known when they played for a season on the famed French Riviera. They made such a hit there that there soon followed a tour of the leadng hotels on the Continent. After this they played an extended engagement at the world famous Havana Country Club in Cuba. During this past summer they were featured at the most colorful dine and dance rendezvous on the North Shore, the nationally known Fo'cas'le at Marblehead. have played at practically every school and college in New England, and are now considered to be the foremost college orchestra

At present they are contracted to play for all the private affairs and debutante parties at the following places in and around Boston: the Kenmore Hotel, the Vendome Hotel, the Continental Hotel, the Winchester Country Club, the

## Dr. Eccles Discusses Difficult Problems That Confront College Admission Officer

By Dr. Willet W. Eccles

The task of college admissions officer is not to allow boys to enter the institution but to select from the group of applicants a freshman class, the members of which are best fitted for the four years' experience they are about to undergo. Not only must be think of each boy! as an individual unit of this manysided body, but he must consider the class fit into the traditions. policies, and intellectual standards

have on the general development of the institution? If the college considers itself to be one of national importance, what is the geographical distribution of the group. These and many other questions he must ask himself while performing his specific duty.

Since about one-third of the cost of educating a boy is borne by the college, it is investing a certain amount of money in every box who the group as a whole. How will enters its portals. Parenthetically this is just as true at Phillips Academy as it is at any college in of the college? In what way will the land and often more so. If they purpose was a tremendous change it be an improvement on past would only realize that in this sense or anyone interested in bers and students of Bowdoin over the slow game which had generations? What effect will it they are being paid to do the job

## The World Is Not Conquered

When Alexander the Great of Macedon was extending his mighty empire throughout the ancient world in the third century, B. C., he was exceedingly upset one day by the remark of his companion Anaxarchus of Abdera that his ambition would always be mocked by a limitless number of other worlds. So unhappy was Alexander that he wept

"Do you not think it a matter worthy of lamentation," he asked, "that when there is such a vast multitude of worlds, we have not yet

These same words can be appropriately applied to the situation in modern times, although more than two thousand years have passed since Alexander held sway.

There are too many people today who are continually deploring the fact that our world has already been conquered. The most notably disillusioned are perhaps the young men and women who have just graduated from college and are faced with the necessity of entering some profession or means of livelihood. They find it difficult to believe that and have a nickel left over for while the geographical frontiers have been conquered by our forefathers, there is still a great world of ideas to be explored by them. "Nothing worthwhile remains to be done," they say. "We can go no farther."

Has the world really come to a standstill? We can turn to our history books for an answer. Civilization has never been static; most sciences have been continually progressing. Not until there no longer are questioning minds which seek to delve into the future, not until independent thinking has been suppressed, not until all imagination has disappeared, not until the nation has ceased to live and to develop,not until then will civilization become stagnant.

Who can say that no longer is anything needed? Why, a pamphlet was recently published in England entitled "A list of 895 most needed inventions" of which many were suggested by people attending the "International Exhibition of Inventions." Every one of us could probably With Every Breath I Take is make his own list of improvements which would be thankfully received. The opportunities are boundless.

In every field of science new discoveries are continually being made. The medical science has increased our life span, perfected transplantation of parts of the human body, and is slowly conquering diseases which torment mankind. The more astronomers discover about the universe, the more questions arise for them to solve. How many problems are waiting to be explained in geology, evolution, medicine, education, aeronautics, and government? As Merle Thorpe says, "The question mark, rather than the dollar mark, symbolizes the American urge to change life for the better."

We believe that the real difficulty lies not with a possible lack of ideas, but with the necessity of keeping people open-minded in regard to the coming changes, for we all know how many there are who, without any reason, obstinately refuse to give up their old-fashioned ideas.

In his Horizons. Bel Geddes writes:

"Are we ready for the changes that are coming?....Automobiles railway trains, theatres, cities, industry itself, are undergoing rapid changes. Likewise art in all its forms. The forms they presently take will undoubtedly have kinship with the forms we know in the present; but this relationship will be as distinct, and probably as remote, as that between the horseless buggy of yesterday and the present day motor

We can easily see how utterly ridiculous it is to complain that no more opportunities remain. In fact, there is still enough to be done in this world to keep busy not only the present generation but also all posterity.

## MOVIE PRE-VIEW

The Little Minister, with Katherine Hepburn, is the movie to be shown in George Washington Hall this evening. Second only to that in her great success, Little Women, the acting of Miss Hepburn is what performance, however, is turned in by the supporting cast, which in- Wearyworld, the down-trodden vil- have them in one of Victor's recent

cludes practically every authentic English accent in Hollywood. The story, adapted from Sir James Barrie's famous book, is fast-moving, and sentimental. It deals with the love affair between the parson of a quaint Scotch village and a stray. mysterious gypsy girl.

Decent selection and good taste "makes" the picture. A superb are everywhere evident in the pic-

### THE DIRT ON THE DISCS Edited by Mij

"Wanna buy a Decca?" is the new, catchy line record dealers are crying here and there (well, mostly there; I haven't heard one yet, but it's pretty good, I think) with the advent of these new discs intended to attract poorly lined pocketbooks. Besides the fact that the records have some of the best artists in the business now and some of the best tunes in circulation now or yesterday, what I like best about the filthy things is that you can get two for the price of one of the old guard chewing gum. Or if you buy forty (40), you have a buck. But you know all that anyway.

While everyone is raving over the large number of song hits from 'Anything Goes." they seem to overlook that current flick, "Here Is My Heart," whence issued the following little family of tunes which have easily caused those from the musical comedy to make roon for them in the limelight. If June In January hasn't been completely murdered at this date by wouldbe Crosbys, et als, try Decca's recording of it by Guy Lombardo. on the back. Both are really the berries, provided you like the orchestra, for they are typical of Lombardo at his best, plus the customary flaw (folks think). Brother Carmen's vocal. For variety, The Dorsey Brothers work on the next ones. This band is pretty good and is fast climbing the ladder of popularity. They're the boys who used to provide background for the Boswell Sisters' recordings, but often nearly stole the record the reselves. Their offering is the coupling, Love Is Just Around The Corner with Here Is My Heart. Bob Crosby (yes, brother) sings. These two Decca records are some of the best jobs done on the show's music.

If you like Libby Holman, vou'l probably go for her latest recording, accompanied by Richard Himber, of You And The Night And The Music with When You Have Only One, aristocratic tunes from the aristocratic operetta, "Revenge With Music." (Victor)

The fellers are still going wild over Glen Gray's Chinatown Ma Chinatown and I am over the reverse II'hen IVill I Know. If vou don't know this one, check it. (Dec-

Some of that old-fashioned every-man-for-himself music came out in Ostrich Walk and the Original Dixieland One-Step just before Xmas. New Orleans Rhythm Kings make the noise. But this is wellpieced together, and in case you are interested in the primitive, this is well worth your while. (Decca)

Imagine the combination of Hoagy Carmichael. Johnny Mer-

## SOCIETY OF INQUIRY PLANS ANNUAL BUDGET

Two Scholarships, Speakers. Among Things For Which \$2000 Will Be Spent

### **BIG DRIVE FOR FUNDS** TO BE HELD ON FEB. 5

With a budget of \$2000 at which to shoot, the Society of Inquiry will hold its annual drive on Tuesday, February 5th. Feeling that the student body should be well acquainted with the institutions to which it will be asked to subscribe. the society has arranged to print a detailed account of the items on the budget.

The expenditure which aroused the most questioning last year was the \$65 spent on the prep reception which is the tea to meet Dr. and Mrs. Fuess given for all preps at the beginning of the fall term. Many of the students seemed to think that sixty-five dollars was an extravagant price to be paying: however, when one realizes all the details of expense which have to be met in giving a tea for 200 people at the Inn, it becomes obvious that

the cost is not excessive. Another item on the budget which should be of special interest to the school is one hundred dollars to the loan library. This money is spent on the books which scholarship men use. Every year old books have to be repaired and a certain number of new ones bought. This is obviously, therefore, a very necessary institution since without it obtaining the necessary books would be extremely difficult if not impossible for most scholarship men.

The largest item on the budget is four hundred dollars for two Society of Inquiry scholarships. The giving of these scholarships is left entirely up to Dr. Fuess. He is supposed to decide which two students

hundred dollars to each.

The second largest expenditure on the list is three hundred dollars for speakers. The society gets about twelve of them a year, and they are paid on the average twenty-five dollars, some getting three times that much. The list of speakers for this season includes such men as Norman Thomas, T Z. Koo, Howard Thurman, Erdman Harris, and Leslie Glenn.

## AFTERNOON VESPERS TO BE HELD SUNDAYS

Fine Organ Music And Talks To Be Order Of Program; Not Compulsory

By the Rev. A. Graham Baldwin

What do you do on Sunday evenings between 5:15 o'clock and supper at the Commons? Would a half hour of fine organ music appeal to you or has that sense of appreciation for music been crowded out of your heterogeneous mixture of interests and appetites? Or perhaps this appreciation has never been awakened?

At any rate for those who do like to leave the beaten path of dormitory chatter or extra-curricular activities for a half hour a week, and think their own thoughts in an environment that is conducive to neditation, there will be several vesper services of music at the Academy Chapel during the long evenings of the winter term.

And for those who enjoy the stimulation of thought brought by man who sees life from a somewhat different angle there will also be opportunities offered. Five outstanding speakers from widely diverse backgrounds will visit Andover during the winter term and speak at our vesper services. One of them comes directly from China. that "Hot spot" of the eastern world whence signals of danger are constantly coming. The others know the danger zones of our political and economic system. They are men who are qualified to speak not only on questions of presentlay problems but also on the quesion of religion in its recent tenlencies and developments. ## **BASEBALL PRACTICE** TO BEGIN FOR WINTER

With Only Three Letter-men Returning Need Much Felt For More Candidates

Again under the direction of Coach Burdett, baseball is swinging into action in anticipation of a hard season ahead. With only three of last year's letter-men returning to the ranks, Coach Burdett has issued a plea for candidates. Everyone who has played baseball is requested to report and try out for the team, a special request being made to all those who have had experience in pitching or catching, as the batteries comprise the team's chief weakness at pres-

Due to the other sports a large squad has not as yet reported, and until more do so Coach Burdett asks the members of the batteries to report Mondays from 1:45 until SOCIAL PROBLEMS CLUB 2:45. Wednesdays from 12:45 to and Fridays from 1:45 until 3:30; infielders and outfielders report at 2:45 on Fridays. This schedule will be changed later on in the season. The batteries will receive a good deal of valuable instruction from Irving (Bump) Hadley, a pitcher on the St. Louis Americans.

The team will be built around the three letter-men. Captain Kellogg, who will hold down his posiin the outfield with little trouble, Holt, who will return to take charge of the initial sack, and Viens, who will undoubtedly spend another year behind the plate.

Wednesday afternoon the first call for practice was answered by about 16 eager aspirants, and the afternoon was spent in limbering up stiff arm muscles and tossing a few slow ones over the plate.

### ART GALLERY HOLDS THREE EXHIBITIONS

Work Of PWA Artists Presented With Chinese Paintings **And Abstractions** 

To the Addison Gallery for the New Year come three new exhibitions of paintings. They include an exhibition sponsored by the P. W. A., one of Chinese paintings and one of prints.

The first exhibit, "Our Government in Art." lent by the American Exhibition of Arts, represents the work of artists employed under the Public Works of Art Project, a New Deal undertaking, which was organized on December 8, 1933, and discontinued on April 28, 1934. Since artists were permitted to choose their own materials, the cuss some phase of the present ecopresent exhibition contains oils, water colors, prints, and photographs. They all represent, however, some phase of American life, this being the Government's sole requirement. The exhibition will be held at the Gallery until January 21.

The second exhibit. "Chinese Painting through the Ages." contains twenty-five original Chinese paintings lent to the Gallery by the College Art Association. Done in United States Presidency. Chinese ink and water colors on fine silk or bamboo paper, the examples shown range in size from small framed panels to large hanging scrolls, and in technique from free, sketchy drawings to elaborately detailed works enlivened with vivid pigments. No matter what the size, manner, or method, they are all alike in that they are all highly decorative. This exhibition will remain at the Gallery until January 31.

In the Print Room will be found group of abstract woodcuts by Professor Josef Albers of Black Mountain College, North Carolina, These prints will be on exhibition until January 31.

### **Bird Banding Club Meets** And Discusses Term Plans

A meeting of the Bird Banding Club was held last Thursday at Mr. Higgins's quarters in Adams Hall in order to make out a schedule of hours for the term's work, and to discuss special measures for banding birds under winter conditions.

A delegation of bird banders, headed by Mr. Shields, next Monday evening will attend the meeting of the Northeastern Bird Banding Association at the University Club in Boston. This excursion is an annual affair looked forward to with great pleasure by the members of the club. The meeting will be addressed by a number of prominent ornithologists, and moving pictures of bird life will be shown.

## PLANS TERM PROGRAM

Howard Thurman, Robert Watt And Mr. Norman Thomas Among Speakers

MR. BOLTEN OF ANDOVER, **BUSINESS MAN, TO COME** 

The Social Problems Club under the direction of Mr. Baldwin has arranged a very interesting program for this term. This small group of boys has been fortunate in securing many well-known men who will lecture during the term.

On January 14th the Club had a supper meeting at the Log Cabin to discuss its schedule, which includes the following events:

January 21st, Mr. Wallace Anderson of Springfield, Mass., will show movies of Russia taken last summer during a trip through that

January 28th, the club will have the privilege of hearing Mr. Howard Thurman, one of the foremost negro educators of the world, speak on "Relations between the Negro and White Races." Mr. Thurman is from Howard University, one of the best negro colleges in the coun-

February 4th, Mr. John Bolten of Andover will lecture on industrial problems in our country. Mr. Bolten is the owner of a large factory in Lawrence.

February 11th, Mr. Robert Watt. legislative secretary of the American Federation of Labor, will talk on "The Significance of Recent Strikes.

February 18th, Mr. Patrick Malin of Swarthmore College will disnomic and political situation. Although no speakers have yet been their college experience (and this obtained for February 25th, and is the real function of the admis-March 11th, Mr. Everett Clinchy. Secretary of the National Conference of Jews and Christians, will speak on "Modern Relations between Jews and Christians on March 4th.

The club takes special pride in having as its luncheon guest, March 18. Mr. Norman Thomas, for many years Socialist candidate for the

Although these men have been secured expressly for the members of this Club, every student is cordially invited to attend any of these Monday night events in Peabody House.

Dr. Eccles Discusses **Problems That Confront** College Admission Officer

(Continued from Page 1)

assigned to them, students would take more pains to be sure to profit from their experience than they do at present. In any event, the admissions officer also asks himself these questions: "Can we invest money in this boy with the reasonable expectation that he will yield satisfactory dividends in terms of college ideas and ideals?" and "Will investing in him be more profitable than putting our money into some other fellow not yet admitted?"

Some people may consider this process a sort of lottery, like betting on some horse in a race. If they do, they are mistaken because the up-to-date admissions officer has at his command such techniques and so much evidence about the boy and the school from which he comes that he can predict with very considerable accuracy what each boy's achievement in college will be.

The problem of choosing a freshman class from a large number of applicants is a complex one. This is particularly true at present when so many more apply than can be accommodated. Ever since the War there has been an increasing number of youths seeking admission to college. Because so many young men cannot get jobs in the present depression this condition has been accentuated in the past few years. It is historically true that in periods of general unemployment the college registrations have been greater than in normal times.

In the course of the last fifteen years due to the fact that there were more applicants than places for Freshmen, the so-called selective process of admission has been developed. In the "old days" any boy with fifteen satisfactory College Board units could enter any college in the country. At first it did not make much difference how he acquired them; often boys would repeat examinations several times in order to get their credits. Gradually it became evident that almost any one could pass an examination if he tried often enough, so that it became the practice to discount anything but the first attempt or at least to weigh the value of the credit if the examination was taken more than once. Nowadays the examination record is even more closely inspected for quality. Those boys who "just pass" have been almost entirely eliminated from consideration. Some of the colleges require "quality grades" in a certain number of units. And even this is not enough. In choosing from the group of applicants those boys who will profit most from sions officer) additional information has been necessary.

It is now universally recognized that a set of examinations can never fully determine a boy's capacity to do college work nor can it give a reliable index of his general desirability. Statistical studies have

*SPECIAL* SUNDAY BREAKFAST 35c THE BURTT HOUSE

26 Salem Street

proved clearly that the school record is much more reliable as an indication of eventual success in college work than any series of subject examinations. For this reason his school record for his entire stay in school is more carefully scrutinized than ever before. The results of intelligence tests also have become important criteria in making these judgments. The Headmaster's personal recommendation has become increasingly important as a factor in making a decision. In addition to the school record the boy's personal characteristics, his ability to acclimate himself to his surroundings and to get along with his mates, his extra-curricular activities, and his personal influence in the school -all these are important in considering whether he is fitted for col-

The high standards set by the College Entrance Examination Board have kept the results of their examinations important in the eyes of the admissions officer, but he cannot overlook the great value of the other factors mentioned above. A compromise, the Plan B form of admission, has resulted. Under this class, properly qualified boys are required to take only four College Board examinations, these in their senior year. It is not fair to say. however, that they are admitted solely on the basis of the examinations because only those who have satisfactory school records in the required amount of work are allowed by the admissions officer to apply under this category. As it now stands, the situation re-

solves itself into the consideration of each boy as an individual. Every effort is made to determine what his eventual success and usefulness will be. The "just-pass artist" does not have a good chance of being admitted to college, for he has already proved himself a poor investment. The fellow with a poor school record who has plenty of ability (because he can cram enough information into his head to pass an examination at the last moment) is quite logically considered not a highly desirable citizen for the college. who has to his credit a creditable performance and has shown over a long period of time that he can be depended upon to do the job at hand gets the place.

Boys planning to enter college should remember that the school's recommendation and the school record in addition to their College Board results will be carefully scrutinized by the board of admissions and it is upon these criteria and perhaps the result of an intelligence test that their admission or rejection will be based.

## Train Exhibition Featured By Two Models In Vivid Display Of Pictures In Library

A very interesting exhibition of | The third and last of this type of the progress of locomotives in the picture shows the first perfected past century is now being displayed | postal car, which was completed in in the Oliver Wendell Holmes li- 1894 and which greatly resembles brary. In addition to the nu- our present freight car. merous pictures and photographs owner, Mr. Alfred D. Slater, expressly for the purpose of being in this exhibition. Mr. Slater incidentally wishes to sell either one or both of them.

These models were built by the Rogers Locomotive Works in 1870: every part is absolutely accurate, and the brake handle on the tender actually turns the brake shoes. (Those interested in purchasing one of these engines are asked to inquire at the library desk for further information.)

Through a picture depicting the first parlor car, which dates back to 1894, one can easily trace the steps of development up to the present time car, which still shows a marked similarity to the first one. This early comfort was installed by the C. and N. W. Ry. with two rows of rather comfortable chairs on one side of the aisle and with is covered with all kinds of decorations, and the car is readily sup-Contrary to the up-to-date style the and a very high smoke-stack. ceiling gets narrower as it reaches. The first Atlantic to Pacific was built by Peter Cooper in 1829 of which travel over 100 miles an the top and finally comes to a point, train, which left Fort William and was operated by the Boston hour.

A picture of a high smokethere are two models which were stacked locomotive of the McKay sent from Cleveland, Ohio, by their and Aldus Iron Works, East Boston, Mass., was loaned by Mr. Daniel E. Champion, a locomotive engineer of the Boston and Maine Railroad. A photograph of the gold and green "Flying Yankee" is first shown at a standstill in the depot and then on a run through the countryside. A head-on view of one of the Boston and Maine 4000 freight locomotives clearly shows a peculiar horseshoe-shaped front which is used as a superheater. A recently built "Streamline" passenger locomotive, said to be able to go 90 miles per hour, can easily do 120: this train was built by the Lima Locomotive Works. One of the strangest groups of photographs consists of the first steam engine. which is practically going to pieces: the modern steam engine, which makes the first one look like less than nothing, but which is in reality its humble descendant; and the one row on the other. The ceiling modern electrical locomotive of two units, all side by side. Among the earliest engines is the one built land. The "Atlantic Locomotive" plied with air by the many fanciful by Robert Stephenson and Com-Car with people sitting at tables, a similar one with a very low body

### Andover Richer Than N. Y. In Proportion To Size

In proportion to its size the wealth of Andover considerably surpasses that of New York, which has by far more millionaires than any other city in the United States. Andover's two millionaires are equal to seven hundred New Yorkers, and no such number is credited to the great Metropolis.

In a list of one hundred and eighty-one individuals whose income for the years of 1915-1920 inclusive exceeded \$1,000,-000, Andover was represented by Maurice J. Curran and William M. Wood, the former earning the sum in 1917, the latter in 1918. This list was made public December 14, 1934, by the Senate Munitions Commit-

June 30, 1886, was decorated by the proud owners, rejoicing that their particular train should have the first honors. Charles Carroll, the last survivor of the signers of the Declaration of Independence, is shown in a photograph with a spade, as the first cornerstone of the Baltimore and Ohio Railroads is being laid July 4, 1828, by the Grand Lodge of Masons in Marv-

## 1935 Cars In Annual New York Exhibition Boast Greater Power, Safety, And Comfort

exhibited for the first time at the table ride. Other manufacturers annual New York show, uphold the steady advance that this industry is making year by year. In every respect the new automobiles surpass the cars of former years, and the industry bids fair to have an exceedingly prosperous year. Better looking bodies are combined with greater comfort, power, and safety in the new models.

Many new features have been introduced that add greatly to the luxury and convenience of modern automobiling. Streamlining has been carried out to a greater extent; so that this year's cars make those of former years appear entirely old-fashioned. Gracefully sloped to reduce wind resistance, these machines are paving the way to a greater age of speed. The manufacturers boast more power and greater economy for their 1935 engines, making then better in every way than the former ones. The new automobiles for 1935, given their makes a more comfor. upon independently still rely sprung front wheels to provide a non-jouncing ride over bumpy roads. The various types of "Nodraft" ventilation have been continued in the new models, showing that this has been an outstanding success. Better hydraulic, cable-controlled, and vacuum brakes are advertised by the different companies for their products. Safety is a dominating factor this year, for the bodies have been greatly strengthened and safety-glass added as standard equipment. \||steel roofs, a great help in protecting the passengers, were introduced on several makes.

#### COMMUNICATION

To the Editor of THE PHILLIPIAN:

One of the best times for reading or looking up references for the following day's assignment is since the library doesn't open until 2:00. The student must, therefore. wait for a half-hour or more. In this time is is quite impossible to accomplish anything worth while, and the time is generally wasted.

Under the supervision of a scholarship student the library could be opened at 1:15, and this would in no way affect the luncheon hours of the librarians. The watter is a simple one, and everybody would benefit by the remedy.

## MR. D. WATT LECTURES AND SHOWS PICTURES

Summer Excursions To France Feature Vivid Trip To Europe

Mr. D. Watt showed moving picures of France and Germany to about fifty undergraduates Tuesday evening. For the past few years he has been organizing groups of young boys and girls between the ages of fifteen and twenty, and he has been taking them to different foreign countries, where they stay long enough to grasp an understanding of the culture, customs, and different reactions of people with whom they have previously had very little or no acquaintance.

These small parties do not go abroad with the intention of sightseeing, but, on the contrary, this is totally sacrificed to find room for the more valuable and the more educational fields. The number going each year has doubled over that of the previous year, and one or two persons from the Pacific coast have recently been enrolled. The voyage is taken third class as it is believed that the individual in this class is more companionable and does not think himself superior to his fellow travellers, as is sometimes the case in first or second class. The party generally leaves June 27 or June 28, immediexaminations and returns the first week of September, allowing approximately two weeks before the

The French group left on a French steamer, which crossed the Atlantic in about seven days. On If everyone in the school were arrival in France a small village of the party for three weeks. Each member slept at the home of a French boy or girl, who was about the same age as the American. The purpose of this was both to create a warm friendship between the two and to make the American feel secure and at home in a foreign land. The French language was studied under the supervision of a skilled instructor, whose duty to give them a general idea of how to speak French in a conversational the language lessons, and all the sports. The season reached its P. A. '36 climax with a hike to the glacier section of the mountains, which was looked forward to and eagerly anticipated for quite some time by all the strong and sturdy members of this jovial group.

Two years ago the German group followed somewhat the same procedure. Three weeks were spent in an old village, the German language was studied, and frequent hikes and bicycle rides were taken by the group. Six days were de-presence. boat trip picture, to be sure, has failed to Danube. is no small bit of territory, stuck up date. north there, but a territory covering fifty thousand square miles, really northwest of us. He told how he predicted the eruption of a supposedly dead volcano, and how he almost lost his life because a shore he was trying to reach had moved a mile since he had last seen it. Then the moving pictures were | Sam Higginbotham put on the screen, and he made remarks while they were shown.

The first pictures were of the dogs; who stole the show from Father Hubbard and his supporting cast of sturdy assistants. One of their number (the dogs) had puppies, which were, though highly amusing to the audience, a serious problem to the expedition. Whenever the explorers were seen on the screen, they were almost always in the water. In fact they were continuously wet from the time they set out until they returned from a trip. In spite of this not a man was sick. Father Hubbard said this was because there was nobody within a hundred miles to carry disease germs to them. As soon as they returned to civilization, they all caught colds at the slightest provocation. The student body next saw pictures of one of The Glacier Priest's greatest achievements, the discovery of the largest crater in Alaska and probably in the world. It is dead, has a circumference of thirty miles, and contains a lake and mountains within mountains inside

After describing the crater, Father Hubbard turned to the true subject of his talk, his trip to "The Valley of Ten Thousand Smokes. En route he and his men spent three days traversing a maze of quicksand bogs. Fortunately they were only four feet deep and not dangerous but very annoying. They also passed through a preserved forest. Formerly it had been luxuriant and had abounded with wild life, but the eruption of a nearby volcano had sent a cloud of sulphur fumes over it and had killed all living creatures. All that remained of the forest was the preserved skeletons of the trees. These trunks were so light that one the size of a telegraph pole could be picked up with ease.

On arriving at "The Valley Of Ten Thousand Smokes," they discovered that the ten thousand had dwindled to slightly over a dozen The clouds arising from these holes in the ground were not of smoke. but steam. When the men and dogs explored these they were forced to wear gas masks, not as a protection against poisonous gases, but against the heat of the vapor. Any deadly fumes that there might be would lie close to the ground, and by watching the dogs they could tell of their

On the return trip Father Hubbard went back two miles through a storm to save the life of a dog who had been a member of the dog team which had once saved his life by pulling their unguided sledge, he The pictures were colored by the being unconscious on the rear, back to civilization. The explorers re-turned safely from "The Valley of Ten Thousand Smokes" and brought with them thirty thousand feet of film.

### Blue To Play M. I. T. In Basketball Today

(Continued from Page 1)

been played in the last of the third and the first of the fourth quarters. When the team, gets completely organized and has a permanent Committee: latterly and after his

line-up which can work out together consistently, it will be able to live up to that standard of play-

The game this afternoon will be with the M. I. T. Freshmen at four o'clock, Although M. I. T. is not celebrated for its strong teams, it usually manages to bring a freshman aggregation that will put up much opposition for any prep school team. The gave will not he easy as so many predict, but will be a hard contest worth watching.

### Ken Reeves To Play At Tea Dance Jan. 26

(Continued from Page 1)

Country and Polo Club, the University Club, and Longwood Towers.

In a letter Mr. Reeves closed by saying, "I shall be looking forward to playing for you fellows." The tea-dance should be worth while going to, if only to hear Ken Reeves and his Orchestra play.

### Society Of Inquiry To Hear Dr. T. Z. Koo

(Continued from Page 1)

people as a whole. One newspaper reported: "In Dr. Koo's speech the voice of the prophet broke in where the diplomat and expert ruled; and in his grip on the ultimate realities and in his statesmanship was a finer diplomat than they."

From Geneva Dr. Koo went to England, where he made a remarkable impression. The Archbishop of Canterbury remarked to Dr. John R. Mott that Dr. Koo impressed him in some respects as the ablest Oriental whom, he had ever

met. c The more recent years have been spent, first as Associate General Secretary to the China National

resignation from this position, he has been giving most of his time to work among students both in China and in co-operation with the World's Student Christian Federation and in visiting countries as widely separated as India, Australasia, Europe, and, for the third North America.

Dr. Koo always carries with him a small wooden flute. Wherever he goes he is fond of bringing forth his flute and playing old Chinese folk tunes from all over the Great Empire, which he has-picked up during his travels. When he is by himself, he often picks up this instrument and assists meditation by playing softly to himself melodies as old as China herself.

In regard to his recent visit to Oakley Country Club, the Dedham Dartmouth, it was reported: "It is hardly necessary to tell you how thoroughly delightful and challenging it was. His address on Manchuria and the World Peace was a keen and penetrating analysis which closed with a challenging plea to back up the agencies of peace with a deep spiritual vitality. The six hundred who listened to him have been talking of it ever since. His charming personality and keen mind cut right through many of the hard-boiled attitudes held by some of us here."

The Society of Inquiry has se cured many other noted men to speak this term. Their schedule consists of the following men who will lecture on many different sub-

Jan. 20: Howard Thurman, famous negro educator.

Feb. 3: Erdman Harris, head of religion at Hill School.

Feb. 10: Arthur Lee Kinsolving Rector of Trinity Church in Bos

Feb. 17: Patrick Malin.

March 3: Everett Clinching, Protestant minister, Rabbi Lazeron, and a Catholic Priest will discuss the difference between the Jews, Catholics, and Protestants.

March 10: Rev. Morgan Noves of Montclair, New Jersey.

## **BATTERY CANDIDATES**

Seventy-Seven Men Sign Up: Twenty-Seven Pitchers. Eleven Catchers

Meeting three times a week, or Mondays, Wednesdays, and Fridays at the cage, candidates for the battery positions on the baseball team have already gotten a good start in the work of prepar-

ing for the coming season. Seventy-seven have signed up for the sport, making a large and formidable showing. Of these, twenty-seven are pitchers, eleven are catchers, and the rest are aiming at fielding positions. These latter. the infielders and outfielders were due to have their first workout Friday, and Coach Burdett hope to be able to select a team from among their ranks. There are already two or three outstanding catchers, including Viens, a retuming letter-man. There are only two other returning veterans of lix vear's team, Holt and Captair Kellogg. The pitching end of the battery is a more open question but Coach Burdett claims he like the size and looks of the group of applicants.

Coach Burdett, who brought the team to an Exeter victory last year is to be assisted again this search by Mr. O'Brien and by "Bump Hadley, a member of the St. Low Browns and an excellent coach Hadley will coach at Andover # til he is called away to spring training.

Mtogether, from the little the can be judged so early in the str son, the prospects are quite fa vorable for a good team this yer and an even finer one in 1936.

March 17: Norman Thomas leading Socialist of the Unite States.
