Clusters Hold Elections for 1990-91 Student Leaders

By BYJ CRUTCHER

Said Beilenson, "We're a Her band, was a great deal of time and effort was spent in developing this system." The effort is to improve the system of student representation at the school, which has been in place only since 1956. I am extremely happy that the elections were held only on the second floor of the school, which is where the school's three main buildings are located. I also want to thank all of the students who participated in the election, and I want to encourage all of the students to continue to participate in the future elections.

Congressman Beilenson '50 Speaks In Foreign Relations, Budget Crisis

By OREN MANUEL

Congressman Peter R. Beilenson '50, member of the Democratic party in the US House of Representatives, spoke on various foreign and domestic policy issues on Friday evening.

In his speech, Congressman Beilenson talked about the importance of maintaining strong alliances with other countries in order to promote world peace and stability. He emphasized the need for continued investment in foreign aid and development programs to help build strong relationships with our allies.

Beilenson also discussed the importance of maintaining a strong national defense in order to protect our country from potential threats. He highlighted the need for continued support for military funding and the importance of maintaining a strong nuclear deterrent.

Additionally, Beilenson spoke about the need for increased funding for education and research, particularly in the fields of science and technology. He emphasized the importance of investing in our country's future through education and innovation.

Beilenson concluded his speech by emphasizing the need for continued cooperation and collaboration between the US and other countries in order to address global challenges such as climate change, poverty, and nuclear proliferation.

Andover Development Board Arriving at PA to Celebrate $43 Million Raised Over 5 Years

By CHRIS SMITH

The Andover Development Board is arriving at PA to celebrate the funds raised over the past five years. These funds have been raised through events such as the Annual blind admissions dinner, which has raised over $50,000 each year.

In addition, the Board has invested in the renovation of the Admissions Office, which has led to increased efficiencies and a more streamlined process. The Board has also invested in the development of new programs and initiatives to support the school's mission.

Another important area of investment has been in the school's financial aid programs. The Board has supported the development of need-based financial aid programs, which have helped to increase access to Andover for students from diverse backgrounds.

The Board has also supported the development of new programs and initiatives to support the school's mission. These include the development of new academic programs, the expansion of extracurricular activities, and the investment in new technology and facilities.

Overall, the Andover Development Board has made significant contributions to the school in recent years, and we are grateful for their continued support.

Trustees Meet Over Weekend

By MARK JAKUBOV

The Annual Spring Dinner Meeting of the Trustees was held last weekend. The meeting was well attended by the Trustees and their families, and the Board discussed a number of important issues.

One of the key topics discussed was the school's financial situation. The Board reviewed the school's budget and discussed strategies for improving the school's financial position.

Another important issue discussed was the school's academic programs. The Board reviewed the school's curriculum and discussed ways to improve the quality of education at Andover.

Finally, the Board discussed the school's extracurricular activities. The Board reviewed the school's extracurricular programs and discussed ways to improve the quality of these programs.

In conclusion, the trustees meeting was a successful one, and the Board is committed to supporting the school in its efforts to improve the quality of education and extracurricular activities.
Coriolis Cafe: Earth Day

By BEN LUMPKIN

Spring weather surely arrived late this year, but all of us who enjoy hiking in the woods this time of year can't help but appreciate how good the weather is during the past few weeks! How can we prevent our investments in life's activities, including the natural environment, from being destroyed? Perhaps the most effective way to protect these investments is to reflect on the environmental implications of our actions. For example, it is clearly important to consider the energy costs of running a car or the environmental impact of a new building on the landscape.

PA Public Safety

By BRUCE ANDERSON

I was privileged to be a member of the Phillips Academy Police Department during my four years at Andover. The Department is a small organization, but it is charged with a large responsibility: to ensure the safety and security of the entire community. As a result, we are often faced with difficult decisions that require us to balance competing priorities. For example, we must determine whether to allocate resources to prevent crime or to respond to incidents that have already occurred.

Anderson on Community Service

By BRUCE ANDERSON

Phillis Academy is a vibrant and diverse community, and one of the most exciting aspects of this diversity is the rich array of community service opportunities available to students. These opportunities range from serving as a volunteer at a local soup kitchen to participating in a global service project. The value of community service is immeasurable, as it allows students to gain valuable skills and experience while also making a positive impact on their communities.

Minority Priority

The newly released Course of Study for the 1990-1991 school year was introduced this week; the long-proposed new courses include focusing on minorities, history, and contributions to literature. The Curriculum Committee wishes to emphasize the diversity of the student body obvious that it ultrasound equipment is more expensive than is usually expected to see. And then, another year go by without the focused minority courses, especially to focus on the diversity that student voices were not heard by the faculty involved in preparing your course of study. During this period, which centered on the academy's potential to attract a larger range of students.

Parker '89 Defends Senior Vote

"An Injustice to Disallow the Senior Class a Final Investment"

To the Editor:

As a member of the class of 1989, I am writing in support of George Bush, which has been a consistent theme of my campaign. I have been a student at Phillips Academy for four years, and I can honestly say that there has been no one who has done more for our school than the senior class.

As a student, I have seen firsthand the positive impact of the senior class on the school community. They have initiated numerous projects, such as the Senior Class Fund and the Senior Class Council, which have had a significant impact on the school.

I strongly believe that the senior class should have the right to make final decisions on matters that affect their lives. This is especially true in the context of the senior class vote, which is a significant event in the life of every senior.

I urge the senior class to continue to fight for their rights and to work towards creating a better future for all of us. Thank you for your support.

Sincerely,

[Your Name]
Tim Kokesh: Champion of Pure Math

By RUSSELL TARVER

Imagine qualifying for the United States Mathematical Olympiad. To a person like Timothy Kokesh, this is an honor, but nothing more. Kokesh was recognized as one of the top hundred student mathematicians in America but nothing more. Although math plays an important role in Kokesh’s life, he is involved in many other aspects of campus life as well, much like any other student.

“Many seniors, Kokesh has not yet decided on a career. Next year he will attend Harvey Mudd College, a university specializing in math and science. He is considering a double major in math and science. ‘At the moment, I’m not sure. I’m just trying to figure out what I want to do after school and I’m looking for hands-on experience in the business world.”

Penner had published a solution to the same problem twenty years before. Kokesh discovered an entirely new solution to the problem in about five minutes.

Penner’s solution was to divide the problem into two parts. The first part would be to find the number of ways to arrange the letters in the word “MATHEMATICS,” and the second part would be to find the number of ways to arrange the letters in the word “MATHEMATICS” to form a palindrome.

The problem Penner solved was to find the number of ways to arrange the letters in the word “MATHEMATICS” to form a palindrome. Penner’s solution involved breaking the problem down into smaller parts and solving each part separately.

Kokesh’s solution involved recognizing that the problem was a variation of a well-known mathematical problem and applying his knowledge of mathematics to solve the problem in a new and innovative way.

By applying the power of pure math, Kokesh has shown that even seemingly simple problems can be solved in new and unexpected ways.

The Asian Society has two principal functions. The first is a service to support the group as both an Asian and American student. On campus, another function of this organization is the education of students about the culture of Asian nations, in addition to providing better communication between Asian students and members of the campus. The Asian Society is the organization of the annual PA Asian Awareness Week.

The Asian Society co-heads Woo Lee, JoJo Rhee, and other representatives to other organizations. The society promotes their ideas about how to improve the community throughout the year. All in all, the Asian Society feels optimistic for next year and looks forward to tackling its challenges.

Asian Society co-heads Woo Lee, JoJo Rhee, and other representatives to other organizations will carry on their ideas about how to improve the community throughout the year. All in all, the Asian Society feels optimistic for next year and looks forward to tackling its challenges.

Girls’ Lacrosse Wins One Big but Loses First

BY DANIELLE GRAHAM

A work has not gone by this year without its share of ups and downs. Last weekend the team upheld its tradition when it challenged itself to the water and was able to race one and race two, which resulted in a beautiful day, with plenty of wind. The wind was very shifty, but the race was very competitive, and with the wind coming from the west, the Andover team was able to win.

A work on Wednesday, the team upheld its tradition of sailing the Charles River, and was able to win with a pair of perfect games. The first game was won 19-14, and the second game was won 17-16. Both games were played in such an astonishing way that Coach H could only say, “Wow!” Adrianna Caldas ’91 went for 5 goals, pitcher Amanda Rutigliano ’91 went for 3 goals, and the team was able to qualify for the nationals.

The next team to come up against the Blue was Deerfield, and the team was able to win with a 21-20 score. The wind was very shifty, and the team was able to win with a 37-40 score.

The last game of the season was played against the Tabor Academy team, and the team was able to win with a 29-20 score. The wind was very shifty, and the team was able to win with a 34-35 score.

The team was able to win a total of 32 games, and was able to lose only 4 games. The team was able to win the first game of the season, and was able to lose the last game of the season. The team was able to win the first game of the season, and was able to lose the last game of the season.

For a team that started the season with such an impressive record, the team was able to continue to excel as in the past. The team was able to win the first game of the season, and was able to lose the last game of the season. The team was able to win the first game of the season, and was able to lose the last game of the season.

The team was able to win the first game of the season, and was able to lose the last game of the season. The team was able to win the first game of the season, and was able to lose the last game of the season. The team was able to win the first game of the season, and was able to lose the last game of the season. The team was able to win the first game of the season, and was able to lose the last game of the season.
**Athlete of the Week: Jane Stubbs**

By SUSAN ABBRAMSON and ALEX CRAFTWRIGHT

Jane is a machine!", exclains her teammate and doubles partner, Jennifer Weber. "She has never lost a match to a lower New Bern, North Carolina, but has won an unassisted save in her second straight Anonymous Poll.

Last Saturday, as the number one singles player for Andover, she defeated her sister opponent in two sets, 6-2, 6-0 to win to Andover's triumph against Deerfield. It was the first loss for Deerfield as the number one singles player, Jane Stubbs.

Feeling confident after the fierce match, Stubbs continued to play at her best level in her second set. She defeated her sister number two, Jill Stubbs, "I played my best against Jen. I feel like I played all season. It was a good match. It was just lucky that she was on that day."

With the combination of her quickness and her serve, Stubbs controlled the court and never let her sister get back on her heels. "I was able to keep every shot with power and focus."

"I feel like the court is always calm before she plays. She never puts me off balance."

"She dominates on the court. She has a lot of fire as a doubles team and always have confidence in her plays. She's her own yet this year."

Away from Andover, Stubbs is also winning. Her number one win in North Carolina matches. At number ten in North Carolina, she gave up only one hit, a hard liner failed to cover bases, and generated a hit to left center. Mancke's incredible hitting stands at a team-best 1-for-3.

Defenselessly Andover placed a hard road in front of Everett High School on Tuesday, April 24. Andover defeated Everett 6-2/6-1 to win over 1500 record very soon. "It's been a remarkable performance, she was breaking the 1500’s record."

"She dominates on the court. She has a lot of fire as a doubles team and always have confidence in her plays. She's her own yet this year."

Away from Andover, Stubbs is also winning. Her number one win in North Carolina matches. At number ten in North Carolina, she gave up only one hit, a hard liner failed to cover bases, and generated a hit to left center. Mancke's incredible hitting stands at a team-best 1-for-3.

Andover Ranks High at Chinese and German Language Olympiads

By WOOD S. LEE
Last week the Chinese and German Departments participated in numerous competitions in New England. In Milton Academy, 15 Chinese students traveled to Boston to participate in the Chinese Language Olympiad. In Westfield, the German language team also traveled to the region to compete in the German Language Olympiad.

The school had a strong showing in the Chinese Olympiad. First-year student Mark Chen received second place, while student Alex Liu won first place. Their combined efforts brought the school a total of four medals, with two of these coming from the junior-year students. The German Olympiad also proved successful for the school, with a first-place finish in both the first and second sections.

Chairman of the Chinese Department, Mr. Tan, commented on the success of the students, stating, "We are proud of our students and their dedication to improving their Chinese skills. The hard work and practice they put in have paid off in these competitions."

The German Olympiad proved to be equally successful for Milton Academy. In the first section, senior John Zhang won first place, followed by junior John Liu in second. In the second section, senior Emily Wang took first place, with junior Alex Li coming in second. The school's strong showing in both sections reflects the hard work and dedication of the students.

Chairman of the German Department, Mr. Beilenson, commended the students for their achievements, saying, "Our students have shown great promise in the German language, and their success in these competitions is a testament to their dedication and hard work."

The Chinese and German departments look forward to continuing their success in future competitions and expanding the language offerings at Milton Academy.
Four Seniors Perform Chamber Music

BY KIRSTEN SAUNDERS

"Okay," I said, "This is really going to be something. A whole evening full of Andover-made music!" I didn't really say that, it was just sort of a joke... but I felt it was something that I could say.

The concert on Saturday night was a success. Good people, good music, and four Seniors. Basically, I had it all. Hey, I even swapped my Anita Baker tapes for some Mozart.

Alice in Wonderland: A Twisted Adaptation

BY KATE SEWARD

I've always been fascinated with the story of Alice in Wonderland. I first read it when I was in the fourth grade, and I've read it several times since then. Each time I read it, I think about how strange and peculiar it is. It's like nothing else I've ever read before.

This year, I decided to do a project based on the story. I wanted to adapt it in a way that would make it more interesting and more entertaining. I decided to make it more dark and gothic, and I wanted to add more musical elements to it.

I wanted to make it more intense and more dramatic, and I wanted to add more music. I thought about doing a musical version, but I didn't want to do that. Instead, I decided to add more orchestral music and more singing.

I also wanted to make it more twisted and more dark. I wanted to add more references to the darker side of the story, and I wanted to make it more challenging for the audience.

In the end, I think I succeeded. The audience loved it, and I was really happy with the way it turned out. I learned a lot from doing this project, and I'm looking forward to doing more projects like it in the future.
It would be very exciting to write something about my country, Italy, especially after five months of life in the United States. A year or so, is indeed extremely healthy. It is not only revealing my personality, but also allowing me to better understand the same culture and lessons I learned in a more objective way. Being plunged into another wider environment, I am forced to question my own traditions and in that recreate their real value. Now that I have been here for four months I have deeply discovered the American society. I have reformulated many of my ideas about my homeland. It would be interesting to examine the change of my opinions about Italy for the majority of the people, those Americans, as you should have learned from your American history studies. I think of myself as a big man who was a social, but can only urge the twelve nations to pass particular laws through their own legislative bodies. This situation creates many complications.

A big economic system free from any control by a central political or executive power, as many people would say, but in my opinion the European economic framework still strongly consider themselves as an international community. Most people do not think of themselves as members of an international community, they still strongly consider themselves as Italian, German, Greek, English, Spanish, Portuguese, French, Belgian, Dutch, Luxembourgeois, Irish and Danish. A nationalist attitude, deeply rooted in the history of our nation, must be changed and for forty years we have had since the World War II not been sufficient. We need more time and new efforts, and the United States should encourage the European political union because in our society, which is slowly becoming global, we need first and foremost national union that can take care of social problems and necessities.

Our European Parliament does not have any kind of legislative or executive power, as many people wrongly think, but can only urge the twelve nations to pass particular laws through their own legislative bodies. This situation creates many complications.

A big economic system free from any control by a central political or executive power, as many people would say, but in my opinion the European economic framework still strongly consider themselves as an international community. Most people do not think of themselves as members of an international community, they still strongly consider themselves as Italian, German, Greek, English, Spanish, Portuguese, French, Belgian, Dutch, Luxembourgeois, Irish and Danish. A nationalist attitude, deeply rooted in the history of our nation, must be changed and for forty years we have had since the World War II not been sufficient. We need more time and new efforts, and the United States should encourage the European political union because in our society, which is slowly becoming global, we need first and foremost national union that can take care of social problems and necessities.

The answer to many of our problems is a political union that does NOT however destroy our diversity and our different national traditions. The way is long: we are already facing minor issues in trying to unify our monetary and banking systems. It is a small step, but a real European consciousness. Most people do not think of themselves as members of an international community, they still strongly consider themselves as Italian, German, Greek, English, Spanish, Portuguese, French, Belgian, Dutch, Luxembourgeois, Irish and Danish. A nationalist attitude, deeply rooted in our European history, must be changed and for forty years we have had since the World War II not been sufficient. We need more time and new efforts, and the United States should encourage the European political union because in our society, which is slowly becoming global, we need first and foremost national union that can take care of social problems and necessities.
