# The Phillipian

VOL. CXLIV, No. 12 Veritas Super Omnia MAY 28, 2021

On April 12, *The Phillipian*, vol. CXLIV, sent out the 2021 "State of the Academy" survey to all Andover students in the hopes of obtaining valuable information about the school community.

Despite two classes being unfamiliar with a printed version of the State of the Academy, *The Phillipian* received a participation rate of 81.8% of the student body—949 participants. The anonymous survey asked a comprehensive set of 183 questions, comprised of ten sections: General, Politics & Worldview, Wellness, Sex, Drugs & Alcohol, School, Campus Culture, Community Diversity, Discipline, and Covid-19.

This year, the survey included content warnings that allowed participants to skip specific questions that may have been potentially triggering without viewing the question itself. We sincerely thank members of the student body for their willingness to share information and personal experiences for this special issue of *The Phillipian*, and we hope that the State of the Academy will serve to inform, enlighten, and create a more holistic narrative of the students at Andover.

Editor's Note: This online issue has been modified since its original print publication to include five additional sections (Wellness, Sex, Drugs & Alcohol, Covid-19, and Campus Culture).

## **POLITICS & WORLDVIEW**

#### **POLITICS AND WORLDVIEW**

After the increased media coverage of social and systemic injustices this past year, 40.7% of respondents' political views shifted to the left, while 11.8% respondents reported that their views shifted to the right, and 47.6% believe their ideologies remained the same. However, support for the Black Lives Matter movement did not drastically change from the previous year. From the 89.9% of respondents who supported the movement in the 2020 State of the Academy, 90.4% of respondents support the movement in 2021—after the racial justice protests of the spring and summer of 2020 sparked by George Floyd's murder and nationwide police brutality. While 33.3% of respondents believe that white people can experience racism, that number is 44.9% among Juniors and 23.3% among Seniors. An overwhelming majority of respondents believe that corporations and the government are responsible for addressing climate change—92.2% and 92.5% respectively—while 75.9% of respondents believe that individual people are responsible, and 1.5% say that humans are not responsible at all.

## SCHOOL

#### **SCHOOL**

At Andover, students spend an average of 4.5 hours on homework per day. In comparison to previous years since 2017, this year's respondents hold the highest average rounded Winter 2020-2021 G.P.A. of 5.50. The administration's removal of '2' and '3' grades in favor of implementing a 'P' for passing in order to accommodate for the unprecedented circumstances of the pandemic might have contributed to this inflation. 39.5% of respondents have switched or attempted to switch teachers in order to attain a better grade, and only 16.1% of respondents believe a '4' is a good grade. While 30.5% of respondents have considered leaving Andover permanently, 87.7% would still make the decision to attend Andover in the first place. Additionally, 73.2% of respondents participate in extracurricular activities because they believe it will help their chances of attending a selective college.
